It held my umbrella firmly on a very windy beach.

BeBe

The longer sand anchor holds an umbrella better in the wind than the shorter anchor does.

This is one of the best beach accessories you can buy.

Another good product goes bad

By [bch in ma](#) on August 11, 2011

I've had two of these for several years, and absolutely loved them. To me, they were the perfect solution to one of life's perhaps trivial, but sometime important problems: how to keep an umbrella on the beach when the wind is blowing. I'm sure I sold many of these over the years, as people would see them (and the wonderful little table top that fits on them) and ask me about them. I always recommended them enthusiastically.

No more. At some point, the manufacturer decided to redesign the product to save ten cents, and ruined it. The cross-piece used to screw the unit into the sand, which used to be a sturdy piece of 1/2 inch PVC pipe, has been replaced with a cheap piece of plastic tubing that bent and buckled on the first use. As others have noted, the set screw to secure the umbrella in the stand, which used to be fairly sturdy, is now made from soft, cheap plastic that also failed on the first use. To add insult to injury, the diameter of the main unit itself is now just slightly smaller than it used to be, so the little table tops I have no longer fit. If you're willing to replace the provided crosspiece and the set screw before using, and if you don't have older tabletops you'd like to keep using, this will work OK. But if you want something that works as promised, or if you've had this in the past and think you're getting a replacement, stay away. What a shame.

The best accessory for the beach

By [Timo](#) on April 3, 2010

Verified Purchase

This thing is a great value for the money. I love it. It is lightweight but very strong. It is also better than the tiny metal anchors out there, since this thing can go MUCH deeper into the ground. Everybody on the beach was asking me where to get one of these things. The tiny plastic screw that is supposed to hold your umbrella in the unit was broken upon arrival, so I "updated" the unit to a regular metal screw with a bended end (bended end to allow the screw to be tightened by hand). The metal screw update is recommended, as it is stronger and works better, I think at least.

It will fit both big umbrellas (large diameter poles) and small umbrellas (small diameter poles).

I would surely recommend this anchor for your next beach trip. It will make you able to relax and not have to worry about the umbrella blowing away. It is so strong, that instead of our umbrella blowing away, it one time folded inside out due to heavy wind, but the anchor did not bulge one tiny bit. So that is good.

Not worth the purchase

By [Douglas B. Schonour](#) on September 4, 2011

Verified Purchase

The 26" anchor is a good idea but fails in it's construction. The thumbscrew, which holds the umbrella in place in the tube, quickly stripped it's threads. The PVC bar, used to turn turn the anchor into the sand, bent the first time I used it. Save your money!

Extremely impressed!

By [va mom](#) on August 25, 2010

Verified Purchase

Keeping my skin and my children's skin protected from the sun is very important to me. Since we love to go to the beach, I needed to find something that could provide a substantial amount of shade. I also needed it to be strong enough to withstand the wind. I haven't had too much luck with beach umbrellas in the past. They always seem to eventually get blown over and busted/bent by the wind. As a reliable alternative, I started using a sun canopy. They really work great but they're definitely not the easiest thing to carry across the sand (esp. when you're trying to manage little ones too). One day, I noticed some people using these extremely long sand anchors at the beach and decided to try

Beach umbrella anchor

This is a very large anchor and was way too large for my umbrella (Costco size beach). Did not use so not surc how it works in the sand.

Published 1 month ago by [PKB](#)

one myself. I found that the key to getting this anchor snug in sand is to start by digging a 1 ft. hole to place it in. I actually use the "open" end of the anchor to do my digging. I was amazed by how steady and firm the anchor held my umbrella in place. This anchor does its job so effectively that it's actually kind of hard to get it out of the sand. I would highly recommend this product to anyone. I plan to buy one more for myself so that I can use two umbrellas at the beach. I also plan to buy one for my dad and one for a close friend. Awesome product!

Worked great, but screw WILL come loose

By [Oggs](#) on August 18, 2011

Verified Purchase

Plum Island, MA August -

I didn't have a problem using the sand anchor and the item is still in one piece, it actually worked better than I expect it!

I read other reviews about the sand anchor splitting at the top and the handle breaking. I put a little gorilla tape at the top of the anchor just to provide a bit more support, but I dont think it made a difference in the quality of the product. Also because of the bad reviews when I placed the anchor in the sand I didn't grab the handles right away(I didnt want them to break), instead I placed my hand on top of the anchor and turn it. It didn't take much force to get it in the sand, the design works quite well. It wasn't until the anchor was about 1/3 inside the sand that i grabbed the handles and turned 2-3 more times.

I like it, it works well and holds the umbrella in place. The anchor is made of plastic so I would imagine you could brake it if too much force is applied, but I dont see the need. For me the anchor worked perfectly!

*** UPDATE *** Crane Beach MA September 2013

After about 1/2 dozen uses the screw that holds the umbrella in place is stripped and no longer creates enough pressure to hold the umbrella in place.

Anchor still works, but we carry a roll of clear tape with us and tape around the umbrella and anchor to keep the umbrella from spinning.
